

NEW AUTOMATED DISPENSER AND SAMPLE STAGE OPTIONS FOR KSV CONTACT ANGLE / SURFACE ENERGY ANALYZER

Do you need a simple and versatile instrument for measuring the contact angle and surface free energy of your functional surfaces? KSV Instruments announces the release of a suite of innovative new automatic options for the CAM 200 contact angle / surface energy analyzer. Combining the automatic sample stage and innovative software with the single-liquid dispenser allows you to run series of contact angle measurements, while the multiliquid dispenser lets you measure surface free energy. The single use autopipette dispenser is perfect in cases where contamination is critical or where test liquids are sticky or difficult to clean. From cutting edge research to industrial process control, KSV makes user-friendly instruments for surface and interface applications (www.ksvltd.com), and helps customers to solve tricky problems. Drop us a line! (info@ksvltd.com).
